---

Hi guys.

As promised, attached is a very simple draft info sheet on RSCs. For purposes of the Policy Forum discussion I need to have something understandable by a large number of participants. That is what I have tried to put together.

However, is my simplistic text accurate? You all understand this better than I do. Please give it a look and I'd appreciate comments. Remember I am trying to keep the language simple. However, I think it would be very appropriate to add some references/web sites at the end of the doc for those people who want to learn more. If you know of any good references/sites I would appreciate you sending them to me.

I also added some questions for you in bold within the text. Still trying to get my head around how to explain how various environmental media "get" the allocations, as opposed to other media, and whether or not ability to control is a factor....

Well, thanks for your help. Wish I had something more complete to send you but figure getting it to you early is important...

Would appreciate any comments in a week or two, if possible.

Cheryl
